

This guide is designed to allow you to choose the correct ring size before ordering. Please note that this method is approximate but will give a reasonably good idea of your finger size.

In order to check the accuracy of this print out, please place a ruler against the line below. A difference of up to 0.3cm over 15cm, or 1/8 inch over 6 inches is acceptable.

Use your wedding band or other flat edged ring as a guide and place on each of the circles below. The right size will be when the edge of the circle touches the inside of your ring all the way round.
